

Program Title (Core In-Person)

Sandtray Play Therapy: Level 2 – Symbolic Integration and Theory (In-Person)

Description

In this two-day workshop, participants discuss and work with symbolic meaning and basic theoretical ideas related to healing trauma and other clinical issues with sandtray therapy. The purpose of the didactic information in conjunction with hands-on experiences is to demonstrate why it is important to help clients experience the sandtray materials in a way that allows them to collaborate with their embodied brains, not just their cognitive processes. A focus for this training is on trauma as it is embedded throughout the body rather than in the cognitive layers of the brain only. In Level 2, participants continue to build on the concepts of “play as a neural exercise” for developing a nervous system that is flexible and resilient. There will be opportunities to explore core issues in play therapy. Participants also will have opportunities to practice skills using symbolic language with a workshop partner.

Co-Sponsor Changes for Psychologists: We want to sincerely thank Risë VanFleet for being our co-sponsor for many years to cover CEs for psychologists. Recently she informed us that she will be focusing her work on her Filial Therapy and Animal Assisted Play Therapy®, and in so doing, she will no longer continue offering co-sponsorships. I have taken one of her Filial Therapy classes and read her book, *Animal Assisted Play Therapy*. I can enthusiastically recommend both, and I believe her work in both areas has contributed greatly to the field of play therapy. I wish her well in all her future endeavors. Thank you, Risë.

Searching for a Co-Sponsor: We will welcome any suggestions if you know someone who would be willing to co-sponsor our trainings for psychologists. Please contact us.
